QGEP is a wastewater management module for QGIS based on SIA 405 (Leitungskataster) and VSA-DSS (GEP) and developed closely to the QGIS application.

Dieses Dokument kann auch als Gesamt PDF Dokument heruntergeladen werden: QGEP.pdf .

Inhalt:

1.1 QGEP Benutzerhandbuch

This represents a guide on how to collect data in QGEP (digitizing), edit existing data and use various tools like length profile, network following and plan plotting.

1.1.1 Digitizing in QGEP

This represents a guide on how to correctly collect and digitize data of sewer networks including building the topology.

Data entry

There are basically two ways:

- Data entry by constructing or digitizing in the QGEP GIS itself
- Data entry in an external programm or software and then importing the position and/or technical data into QGEP e.g.:
  - coordinates from manholes from measurement
  - position and/or technical data from another GIS or CAD system
  - using data from the surveyor (e.g. property boundaries) as a basis for defining catchment borders
  - other

Data entry in QGEP needs some understanding of the underlaying data model VSA-DSS, but is supported with some great data collecting wizards and forms that link the different tables correctly together.

Digitizing Waste water structures

QGEP has a wizard to correctly collect manholes and special structures.

TO DO: Explain how it works

General

Allgemein: Abwasserbauwerk-Bauwerksteil-Abwassernetzelement Allgemein: Wizard und Eingabemaske mit wichtigsten Feldern / Subtabellen Bezeichnung: Default, Unique, ... Schacht (Deckel) und Abwasserknoten beim Normschacht / beim Spezialbauwerk

Digitizing Waste channels

QGEP has a wizard to correctly build channels and connect them to the manholes / special structures and build up the topology for waste water nodes and reaches.

TO DO: Explain how it works

General

- Kanal/Haltung (Digitalisierrichtung, Schnappen)
- Weitere verknüpfte: Eigentümer, Rohrprofil, Hydraulische Geometrie, Hydraulische Einbauten
- evtl. Verknüpfungen erfassen

1.1.2 Editing of existing data

This represents a guide on how to edit existing data in QGEP.

TO DO: Explain how it works

General

- Attribute ändern
- Verknüpfungen ändern
- Subklasse eines Abwasserbauwerkes ändern (ObjektID ändert dann auch!)
- Kanäle unterteilen
